Push

Faster!
Safer!
And without Tools!

Price List March 2017

We've got it!

We introduce the new **ixPress2** push-fit system, the second generation of the **ixPress** fitting, designed and manufactured totally in Spain by Industrial Blansol and now with:

- **Improved performance**
- **Error-free assembly**
- **The best price**

The new **ixPress2** will enable you to make incredibly fast and safe connections, without tools and at an incredible price. The new design avoids all human errors, by making impossible to introduce the pipe if it has not been properly calibrated before, eliminating in this way one common problem with the standard press-fittings.

So simple?

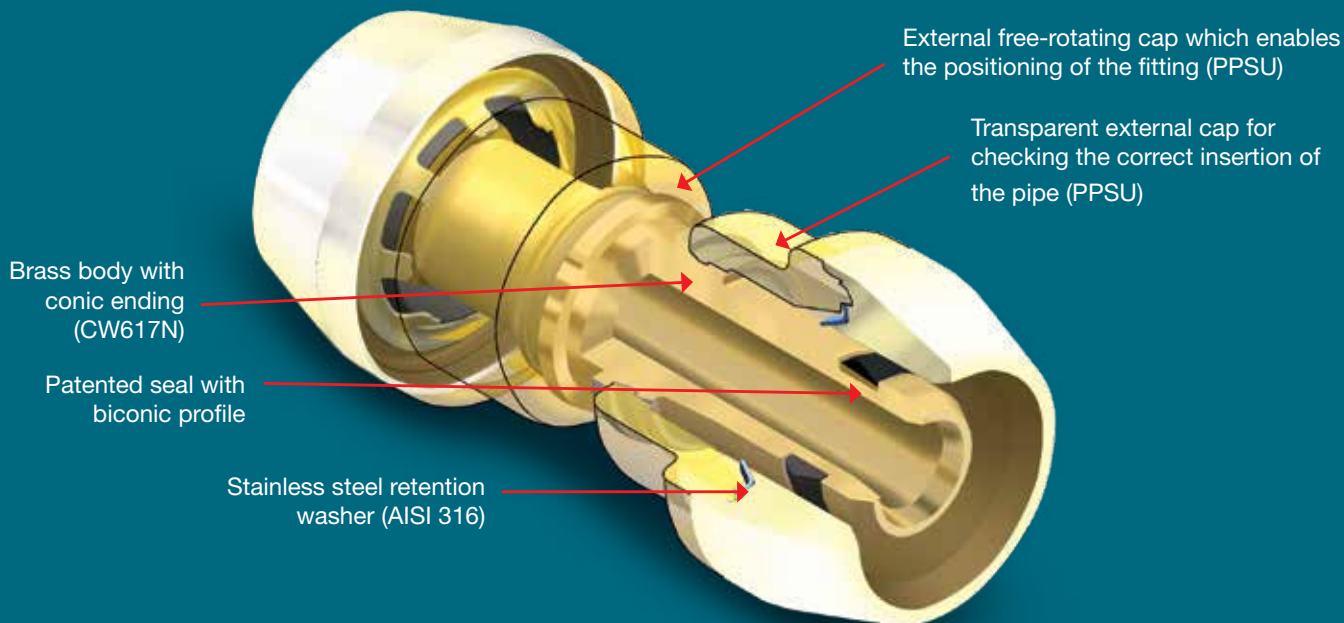

Can I trust such an apparently simple fitting system, which requires neither tools nor difficult explanations?

Of course!

Behind this apparent simplicity there is a thorough research work carried out by Industrial Blansol, thanks to its more than 30 years of experience in the design of plastic pipe fittings.

The new **ixPress2** system is an improved evolution of the first generation, designed and manufactured totally in Spain by Industrial Blansol.

How to assemble it?

ixPress2

Designed and manufactured in Spain

Brass Forging

Brass Parts Deburring

Multilayer Pipe Welding

Brass Machining

PPSU Injection Moulding

Plastic Pipe Extrusion

PPSU Cap
Ultrasonic
Welding

Final Assembly

Plant in Ambrosero

25 years guarantee

INDUSTRIAL BLANSOL, S.A. guarantees, through a civil liability insurance policy, all the eventual damages caused by the use of the **ixPress2** fitting system, up to an amount of 1.500.000 € and for a period of 25 years, in any country of the world with the exception of the USA and Canada, due to:

- Design defects.
- Manufacturing defects.

The present GUARANTEE WILL NOT BE VALID in the following cases:

- Non-compliance with the instructions given in our technical documentation.
- Use of the fitting with pipes not manufactured by Industrial Blansol.

Assembly instructions

1. Cut the pipe with a proper pipe-cutter, being sure that the cut is clean.
2. Check that the pipe ending is free of chips.
3. For **ixPress1** fittings calibrate using only the plastic calibrator.
4. For **ixPress2** fittings calibrate using only the Kalistar calibrator.
5. Use the **ixPress2** fittings exclusively with Barbi pipes.
